Bee Cups: Clover and Crow Bundle

Photo credit: Bee Cups

Bee Cups is a women-owned, USA-based brand (handcrafted in Dallas, TX) dedicated to supporting pollinators through beautifully designed, small-batch porcelain products. Their signature Bee Cups® are shallow water vessels featuring a patented Bee Vision Glaze that reflects ultraviolet light—visible to bees, butterflies, and other pollinators. This safely attracts them for hydration without drowning risks or mosquito breeding. These eco-friendly, 100% plastic-free items help create thriving gardens by boosting pollinator health and plant vitality.

Bee Cups' Clover and Crow Bundle is a whimsical, seasonal set that gifts Mom pollinator and wildlife support. It includes a 5-pack of Bee Cups® in seasonal-colored shades, with each holding about a teaspoon of water. Additionally, she'll enjoy a box of approximately 15 UV-glazed trinkets known as Murder Mix™, shiny, crow-attracting pieces that spark curiosity

and playful interaction for the intelligent birds. Handcrafted with subtle variations for authenticity, the bundle uses non-toxic porcelain and features the signature UV-reactive glaze that glows under blacklight (appealing to both bees and crows). This duo is perfect for nature-loving moms who enjoy watching pollinators and wildlife thrive right in their

backyard. Retails for \$48 at bee-cups.com.
