Replere Renew & Firm Eye Serum Nabs “Night Cream Product of the Year” In 8th Annual Beauty Innovation Awards

Annual Awards Program Recognizes The Best Of Companies, Services and Products Shaping The Future Of The Global Beauty Industry

LOS ANGELES, Nov. 10, 2026 (GLOBE NEWSWIRE) -- The 2026 Beauty Innovation Awards, an independent recognition platform highlighting the most innovative companies, services, and products in the highly competitive Beauty care industry, today announced that the Renew & Firm Eye Serum from Replere, a clinically proven, antioxidant skincare collection that helps to slow down aging and restore the skin’s natural radiance, has been awarded “Night Cream Product of the Year” in the 2026 awards program.

The Renew & Firm Eye Serum from Replere repairs daily free radical damage. The product has been clinically proven to visibly reduce fine lines and wrinkles as well as to visibly firm delicate skin around the eyes. The serum is ideal for all skin types, including sensitive skin, acne-prone, dry, oily, mature, and combination skin.

Ingredients include Coffea Arabica Seed, Aloe Vera, Glycerin, Hyaluronic Acid, Ascorbic Acid, Panthenol, Biotin and more. Importantly, there are no parabens, fragrances, or dyes. Replere's line consists of a phenolic antioxidant skin care system that contains Coffea arabica as well as concentrated fruit and vegetable extracts.

In a clinical study, participants using Replere were able to show improvement in firmness, clarity, tactile roughness, hyperpigmentation, blotchy redness, fine lines and wrinkles and overall brightness of their skin. All Replere products are produced using a patented laboratory process and are packaged in airless containers to ensure purity and potency.

"Antioxidants help us to fight the most potent form of aging -free radicals. All Replere products are designed to immediately improve skin's appearance, replenish skin's needs, and repair the skin long term, including our Renew & Firm Eye Serum," said Dr. Debbie Palmer, a board-certified dermatologist and founder of Replere. "We're grateful to Beauty Innovation for this award. Our line is the first to target all of the major free radicals that damage and age the skin, and for me, the sweet spot is delivering products where science, innovation, safety and meaningful results intersect."

The mission of the Beauty Innovation Awards is to celebrate and highlight the efforts and successes of innovators and leaders in the Beauty industry. The awards program honors standout brands and offerings that are shaping the future of skincare, makeup, haircare and personal care. Categories reflect the ever-expanding beauty industry, ranging from Bath & Body, Hair, and Skin, to Global Beauty Heritage, Inclusivity & Representation, and Beauty-From-Within.

Today's beauty shoppers are focused on products that perform, provide transparency in ingredients, and are looking for brands and services that fit their lifestyles and align with their values. The Beauty Innovation Awards celebrate the brands and products that are redefining these standards and making an impact across the beauty landscape. The 2026 Beauty Innovation Awards attracted thousands of nominations from around the world.

"Replere delivers natural skincare without compromising on science or results. Beauty consumers are often caught between skincare that is rooted in science and makes a visible difference in fine lines, wrinkles, firmness, texture, hyperpigmentation, and redness, and the tradeoff of harsh ingredients or chemicals," said Travis Grant, Managing Director, Independent Innovation Awards. "With Replere, you don't have to choose between natural-inspired skincare and science-backed efficacy. Replere's Renew & Firm Eye Serum has been clinically proven to improve the health and appearance of the skin around the eyes over time. We're pleased to single out for 'Night Cream Product of the Year.'"

About The Beauty Innovation Awards

About Replere
Replere® is a clinically proven, antioxidant skincare collection that helps to slow down aging and restore the skin's natural radiance. All natural formulas are paraben, fragrance and dye free. The line includes multiple anti-aging ingredients, including Coffea arabica or coffee fruit, that work together to neutralize the primary free radicals that damage skin—helping to reverse the visible signs of aging.
